

Lunar Farside Drydocks

The Lunar Farside Drydocks are the location for the majority of the larger D1 fleet vessels, such as the [D1 Genesis](#) and [D1 Revelation](#), as well as the other [battleships](#) and [spacecraft carriers](#). The Drydocks are in a [Lissajous orbit](#) around the L2 [Lagrange point](#), and are therefore hidden from Earth view by the Moon itself. There are large cloaking fields that can be activated to hide it from any non-Galactic spacecraft that may orbit the Moon, so it remains unknown to the bulk of the planet's population.
