# Ke!endarian Coalition

Ke!endarian Coalition

# House Molcren

A house in the [Ke!endarian Coalition](#).

# Loteran Coalition

A loose coalition of allied systems centered around Loterus V in Division Eight. Members of this coalition may or may not be members of the Pan-Galactic Coalition; it is suspected that the separatist Bozheen, aka the Snails, may be members of this loose confederation.

# Pan-Galactic Coalition

The governing/legislative body of the majority of the Milky Way Galaxy. There are some systems that do not belong to the Coalition, but the majority do. It is a representative republic, somewhere in between the American Congress and the British Parliament in structure and action. Because it is so large -- there are thousands of planets represented -- for any actions that must be taken swiftly, there is a special, smaller body -- the Ennead, or Council of Nine -- to analyze and act.

# Sydys Concordat

The treaty that establishes the membership of the Pan-Galactic Coalition. New members of the PGC become signatories to this document.

# Persis Federation

Based in the Andromeda Galaxy. There are numerous species there, all of which seem to loosely resemble Earth cephalopods, and may be amphibious, or may once have been amphibious. They are run by an hereditary Premier. The current Premier is Hsrs Syrsh. He is good friends with PGC VP Teela Krimnet, Division One Director Fox, and Alpha One.

# Ulyffon Alliance

An alliance of the 16 Ulyffon species.
