# Arcturus VII

Planet in the Arcturus system, known to its inhabitants as Deltir.

# Bardothi

# Beta Ophiuchi 7

# Borscht

A planet in a new star system of the Orion Molecular Cloud Complex, discovered by Alpha One during Omega's pilot training run. It is populated by plant-based creatures, including the principal intelligence on the planet, sapient dire beets. The dire beets are what might be considered "cave beets," in that their development is still rudimentary in terms of culture and technology.

# Braxitar

# Caltor

A super-Earth in a Jovian-type system. The Caltorians are in an ongoing negotiation with the Ulyffon Alliance, so long that it has become something of a running joke in diplomatic circles, yet is still deadly serious.

The most common epidermis color is blue, though there are other colors, including bright teal, purple, bluish shades of green, a purplish-red, and even bright orange, though yellow is not seen as a skin color. They are an advanced culture, highly intelligent, and long-lived.

# Delzanth

Homeworld of the Delzantians.

# Doukeed

An artificial resort planetoid in the Mu Phoenicis system.

# Dryad

Home planet of the Botanoids. In the Embelu system

# Earth

Home planet for Humans.

Earth

# Moon

The moon of Earth.

# Edeptis IV

Planet in the Edeptis system, on the galactic rim. The Edeptans are short, red skin, yellow eyes. It is a recent signatory to the Sydys Concordat. The planet has areas that are very rich in mineral resources, and grows extremely large corundum and diamond crystals, such that they are often used in slab form as medallions. Other parts of the planet are poorer in resources, however, and may not even have basics like power generation stations. The soil tends to greenish tones, and the foliage tends reddish. Given the inhabitants' genitalia is plant-like, and they possess reddish epidermal layers, it is unknown as yet if they are plant- or animal-based sentients. They are currently classified as Verod in the Gibheer Morphology System, which is a kind of catch-all designation. When more is known about the Edeptan people, this classification may change to a more suitable designation.

# Emdali (Draigon)

Homeworld of PGC President Pulgey Entiyti. It is also the homeworld of two separate, but related, sentient races, the Draconans and the Reptoids. Early in the planet's history there was enmity and competition between the two races, but Emdali's most celebrated holiday commemorates the cessation of hostilities and the declaration of peace between Reptoid and Draconan.

Emdali (Draigon)

# Eospen

Home planet of the Ererot. In the Delta Antliae system

Home planet of the Exinulans. Also known as GJ 273b or Luyten b. Located in the Luyten's Star system. See also here: [https://en.wikipedia.org/wiki/Luyten\\_b](https://en.wikipedia.org/wiki/Luyten_b)

# Flibitz

A Jovian-like planet. Home of the Tethanoids.

# Krasnovia

A planet in the Ardrub system, known for its manufacture of excellent waffle irons. On Earth, the name is sometimes used as a 'fictional' place for war games. This is because the officer stationed in D.C. is from the REAL Krasnovia. This has been the source of some confusion on Earth's social media, resulting in an author of some note being temporarily banned for referencing war gaming. (What no one realizes is that he is, himself, from Krasnovia.)

# Kufthuria

# Kusheer

Homeworld of the Skulians, intelligent seaworms with psuedopod-like antennae.
