

# Sslthsd

The flagship commanded by Admiral [Suud Guurn](#) when Coalition Bet Fleet blockaded the Cortian system.

"...The *Sslthsd* has the biggest damn force field generators the Admiral [Guurn] could manage to cram into it. And the power plants had to be big enough to drive it, the weapons, AND one of the hottest warp generators he could find. That ship will handle the entire combined defensive weaponry of Aleancë without blinking, then turn around and zap every defensive position it can find."

~Stephanie Osborn. [Trojan Horse](#)
