

Vehicles

Atmospheric and ground vehicles. This includes everything from Fox's motorcycle with sidecar, to the personally-selected, modified cars that agents drive, to aircraft such as the modified T-38s Alpha One and -Two use, airskimmers, and various models of spacecraft. Cover image in public domain.

Airskimmer

One of the long-range craft used by Division One are known as Airskimmers. They are of course from off world and have been modified or “hot rodded” to higher performance. Their original speed range was 400 to 850 mph. After “hot rodding” they are good to 1065 mph. They are equipped with; passive cloaking; solid hologram projections; moderate sensor suite; universal translator; minimal protective force fields; and they use the same fuel as a T-bird [xylene/toluene/isopropanol [octane rating 119]].

Airskimmer

Crash Cart

Airskimmer used by team Alpha Two.

Airskimmer

High Flight

Airskimmer used by team Alpha Four.

Airskimmer

Schmaltzblitz

Airskimmer used by team Alpha One. AKA “Greased Lightning”; Echo sometimes calls it “Donnerfutz” aka “Thunder Fart”

Airskimmer

Take Five

Airskimmer used by team Alpha Five.

Airskimmer

Break Five

Used by team Alpha Five

Black Helicopters

The black helicopters of the Agency have become lore in urban myth—probably because they are the most likely to be seen and recognized. They are relatively standard helicopters of various manufacture/ models, with a range of sizes available, determined by type of mission. All are black, and all have been outfitted with stealth rotors/ engines. They possess passive cloaking, but no force field shielding.

Black Helicopters

Black Helicopters

Ostensibly US Army Black Hawks landing in Kuwait.

Corvette

The Corvette is Alpha One's principal vehicle. Designated Echo-2 because it is that agent's second vehicle, the 'Vette (as he is wont to call it) is considerably enhanced over a factory standard Corvette. This includes a more powerful engine, higher road speeds, flight ability, and passive cloaking. In addition, the rear seat is equipped with a small space warp, enabling the comfortable travel of four passengers. The trunk is also outfitted with a similar warp, allowing for surprisingly large quantities of equipment and weaponry to be transported.

Corvette

Other Vehicles

- Director Fox -- BMW M8 Coupe
- Alpha Two -- Lexus GS F
- Agent Mu -- Lamborghini Huracan
- Agent Zulu -- an original H1 HMMWV, or H1 Hummer, nicknamed "The Beast," heavily armed and armored

T-38

The T-38's are highly modified, essentially rebuilt on an ultra-strong light frame of an alien alloy. They possess double afterburners, 2,500 pounds of dry thrust, 3,000 lb. first level afterburners, and 3,250 lb. secondary afterburners. Instead of burning JP-4 [gasoline} or JP-5 {kerosene} they burn an alien blend of xylene/toluene/isopropanol {octane level 119}. There are two operational T-38s belonging to Alpha One and Alpha Two. Alpha One flies the "T-bird". Alpha Two Flies the "Jet".

T-38

T-38 Talon

Ostensibly a T-38 of the 4450th Tactical Group, Tonopah Test Range Airport Nevada. Public domain image.
